

# OPTION

# TOM CONNECT

The modem-based communication service TOM Connect enables TOM to send a message when its time for a bag switch or the machine requires maintenance. It is perfect for environments where many receptacles are spread out in a large area like an airport, a mall or a theme park. No more rounds on routine just to check on the status of the waste bins! Only go see TOM when it needs attention and alerts you.

## TOM CONNECT BENEFITS

**More productive use of time** for your staff. Only visit TOM when notified!

**Excellent service for the visitors:** With timely bag switches, TOM is always in operation and it contributes to a clean and inviting environment at all times.

**Stay in control:** The web portal provides an overview of the current status of all your units.

## TOM SENDS A MESSAGE

TOM communicates by email and is able to send two types of messages to its caretakers:

- 1) The bin is almost full and TOM requires a new bag.
- 2) TOM needs maintenance

## FREE ACCESS TO CONNECT WEB PORTAL

When your first TOM is installed, you will be invited to Connect Web Portal, where you can log in any time to monitor the current status of your fleet of TOM:s. In the portal you easily add notification recipients for your organization.

## CONNECT COMMUNICATION SERVICE

When you order Orwak Connect, you get a modem, a license and can start enjoy the communication service. A SIM card is already implemented in the modem, so you do not need to worry about local operator agreements or additional unanticipated costs. The service will be prolonged, if not actively terminated, on a yearly basis, so that you can continue to benefit from Orwak Connect.

## TOM CONNECT FOR UNITS IN THE FIELD

When you order Connect for a new TOM unit, the modem will be factory mounted before it is shipped. However, for existing TOM units you can order the TOM Connect Retrofit kit for field mounting by a service technician.

# OPTION

# BAG TROLLEY

Some types of waste may weigh heavily in the bag and for faster and easier transportation of the full bags, we offer you a trolley designed for the dimensions of TOM.

## EFFORTLESS BAG SWITCH

The solid metal trolley is robust but still light and convenient to handle. The bin is easily attached to the trolley with a pin. When TOM alerts you that the bin is full, you effortlessly pull out the trolley and the entire bin with the full bag inside will follow.

Just roll it away from TOM to your waste storage behind the scenes and replace the bag. Return with the bin, push it in and leave the trolley inside TOM for the next bag switch.

A pin keeps the bin attached to the trolley

# OPTION

# TRAY HOLDER

Facilitate and speed up waste disposal in quick service by inviting the customers to leave their empty food trays on top of TOM!

## DURABLE TRAY HOLDER

This solid metal tray rack in robust design keeps a firm grip on the machine and offers steady placement for the trays. Suitable for standard trays with maximum dimensions of 590mm x 566 mm (23"x22.28")!

## EASY TO MOUNT AND REMOVE

The tray holder is ready to use. No screws, bolts or other alterations are required. The rack is easy to place on top of TOM and it is just as easy to remove again.

No trays are included when ordering the the tray holder.

# OPTION WRAPPING

**TO FIT IN OR TO STAND OUT!** Profile TOM to convey your message! Order TOM wrapped in premium vinyl in any color and pattern of your choice! It provides a smooth and resilient surface resistant to moisture and daily wiping. The wrapping is mounted professionally on TOM before delivery.

## HIGH QUALITY WRAPPING

TOM is wrapped in durable high quality vinyl and it is protected against moist by an extra layer transparent laminate. The vinyl tightly shapes itself around the machine and gives it a smooth shining finish. The wrapping is mounted on TOM by professionals before delivery.

## CUSTOMIZED TO YOUR TASTE

Choose the color and pattern of your new TOM and just send us a ready-to-print file! On demand, we can also offer you a design proposal, if you do not have a ready concept yet.

## IN FOR THE LONG RUN

The wrapping is developed to give a resilient long-lasting finish in frequented environments and endures daily wet-wiping with common detergents (must not contain any solvents).

NOTE! If placed outdoors, please protect TOM from UV-radiation. Long-term exposure to strong sun radiation may cause the colors to fade and the laminate to turn yellow.

## TOM - YOUR POSTER BOARD

Use TOM as an eye-catching poster board! Spread the word about campaigns or the special offer of the month! Do you need to change your message often? In that case we recommend that you print it on an easy-to-remove sticker and apply it directly on TOM or on top of a wrapping.

# OPTION

# TRANSPARENCY KIT

Due to security reasons, some environments present special requirements for transparency of installed equipment. This is especially true for waste receptacles, as the unknown contents poses a potential safety risk. Meet the customer's demand with the transparency kit for TOM!

## REVEALS WHAT IS INSIDE

There is no need to open the door and take out the bin to reveal what is inside. With the transparency kit mounted, just take a quick look at the clearly visible contents when passing by TOM.

The kit consists of a transparent door and a transparent bin. Both parts are made of clear, strong and resilient plastic.

The standard bag for TOM is transparent.
